

Water Cooperative of Central Florida
Public Facilities Report

This report is provided by the Water Cooperative of Central Florida to its member governments in satisfaction of the requirements of Section 189.08, Florida Statutes.

1. Introduction

Section 189.08, F.S. requires each independent special district such as the Water Cooperative of Central Florida to submit to each local general-purpose government in which it is located a public facilities report and an annual notice of any changes.

2. Specific Information Required:

(a) A description of existing public facilities owned or operated by the special district or facilities operated by a third party under agreement with the district:

Two Lower Floridan brackish water production wells and associated monitoring wells located in the Cypress Lake area. The wells are not currently utilized for water production but will be put into service upon completion of the Cypress Lake Reverse Osmosis Water Treatment Facility. Each well, when placed into service, is expected to yield 3.75 MGD (2,600 gpm).

(b) A description of each public facility the district is building, improving, or expanding or is currently proposing to build, improve or expand within the next seven years:

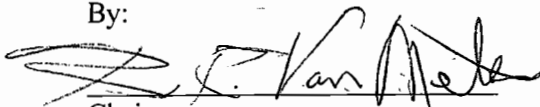

Currently in preliminary design is the Cypress Lake Reverse Osmosis Water Treatment Facility and associated appurtenances, such as additional production wells, concentrate disposal wells, and raw water pipeline. The facility, which will be designed to treat 37.5 million gallons per day (MGD) of brackish water to produce approximately 30 MGD of finished (potable) water, could potentially be designed and constructed within the next seven years; however, the timeline for construction within the seven year time frame could change based on the Water Cooperative's need for additional water supply by the participating utilities beyond what is currently permitted. Firm funding has not yet been established for the project; however, funding will be provided by the participating utilities, or by tax exempt financing by the Water Cooperative.

(c) Other information:

None at this time.

Dated this 13 day of July, 2016
